

Use subtraction to solve the problems. Make sure you line up your decimals.

Answers

1) $89.7 - 34.44 =$ _____

2) $69.2 - 35.2 =$ _____

1. _____

2. _____

3. _____

3) $84.10 - 9.6 =$ _____

4) $18.2 - 10.68 =$ _____

4. _____

5. _____

6. _____

5) $67.8 - 14.47 =$ _____

6) $30.3 - 2.9 =$ _____

7. _____

8. _____

9. _____

10. _____

7) $38.46 - 16.47 =$ _____

8) $98.35 - 46.28 =$ _____

9) $92.57 - 26.3 =$ _____

10) $18.4 - 6.87 =$ _____

Use subtraction to solve the problems. Make sure you line up your decimals.

1) $89.7 - 34.44 = \underline{55.26}$

2) $69.2 - 35.2 = \underline{34.0}$

3) $84.10 - 9.6 = \underline{74.50}$

4) $18.2 - 10.68 = \underline{7.52}$

5) $67.8 - 14.47 = \underline{53.33}$

6) $30.3 - 2.9 = \underline{27.4}$

7) $38.46 - 16.47 = \underline{21.99}$

8) $98.35 - 46.28 = \underline{52.07}$

9) $92.57 - 26.3 = \underline{66.27}$

10) $18.4 - 6.87 = \underline{11.53}$

Answers

1. $\underline{55.26}$

2. $\underline{34.0}$

3. $\underline{74.50}$

4. $\underline{7.52}$

5. $\underline{53.33}$

6. $\underline{27.4}$

7. $\underline{21.99}$

8. $\underline{52.07}$

9. $\underline{66.27}$

10. $\underline{11.53}$
